Mishap Confidence Interval

- UCI = Upper Confidence Interval LCI = Lower Confidence Interval

- Rate values above the UCI or below the LCI infer a statistically significant change is probable. This is only an indicator. Significance cannot be determined until end-of-year._

- Values between the UCI and LCI infer that nothing significant has occurred to increase or decrease mishap rate.

(Confidence Interval is based on: Poisson Rate related to a Chi Squared Distribution and calculated using FY09-13 data except for the Lost Work Days and Lost Time Case slides which were based on a normal distribution).
